

NEW BRAND NEW PRODUCT DURALITE POLE

ENGINEERED LIGHT BUILT STRONG ALUMINIUM POLE

The **DURALITE™ Aluminium Alloy Harvesting Pole** is precision-crafted from **T6-6061 aerospace-grade aluminium**, offering an exceptional balance of strength, durability, and lightness. Its unique **round outer diameter** ensures perfect compatibility with standard clamps and tool fittings, while the **dodecagon-shaped inner structure** – reinforced with small arcs at every joint – provides enhanced rigidity and bending strength.

This advanced internal geometry makes **DURALITE™** poles, yet significantly more stable and resistant to bending under load.

WEIGHT

- A) OD 34MM X 1.6MM (T) = 0.410 KG/MTR
- B) OD 38MM X 1.6MM (T) = 0.458 KG/MTR
