

NEW BRAND NEW PRODUCT NYLON HOLDER FOR SICKLE

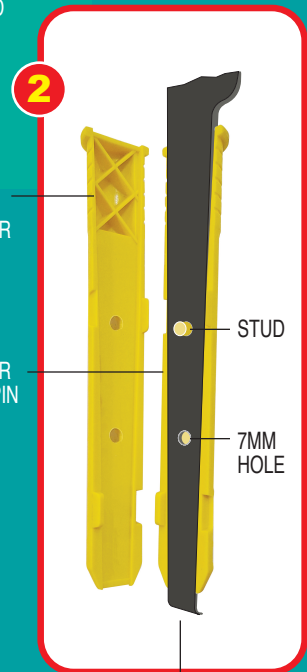

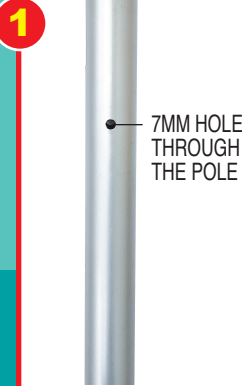

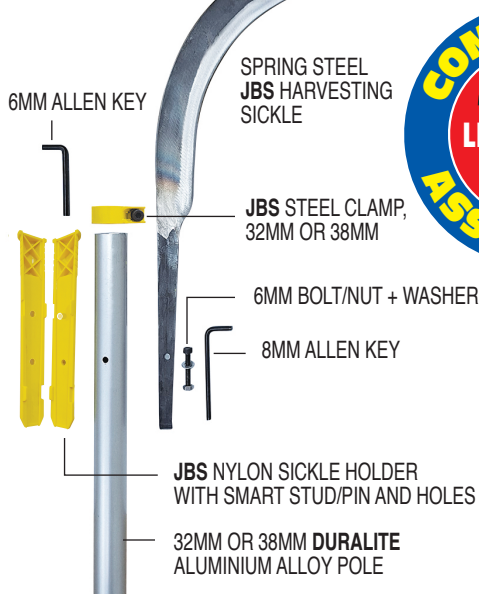

Engineered for superior performance in oil palm harvesting, our **JBS Nylon Sickle Holder** features a smart **Stud/Pin** and another 6.5mm hole just below the stud/pin. The other half of the Nylon Holder will have two 6.5mm holes similarly positioned with the stud/pin and the hole. This Nylon Holder is specially designed to perfectly fit in position the stem of the sickle, which is manufactured with 2 holes similarly positioned with the stud/pin and the hole of the Nylon Holder. This innovative Nylon Holder ensures a well precise fit, allowing the sickle to be securely positioned inside the pole for maximum stability.

Made from **high-strength, impact-resistant nylon**, it combines durability with lightweight efficiency, reducing vibration and enhancing cutting control. Once positioned, the sickle holder is firmly secured using a **reinforced steel clamp**, delivering a strong slip-free connection that stands up to demanding field conditions. Safety of harvester is further ensured when a 6mm Bolt & Nut is fitted so that the sickle will not be dislodged out of the pole during harvesting.

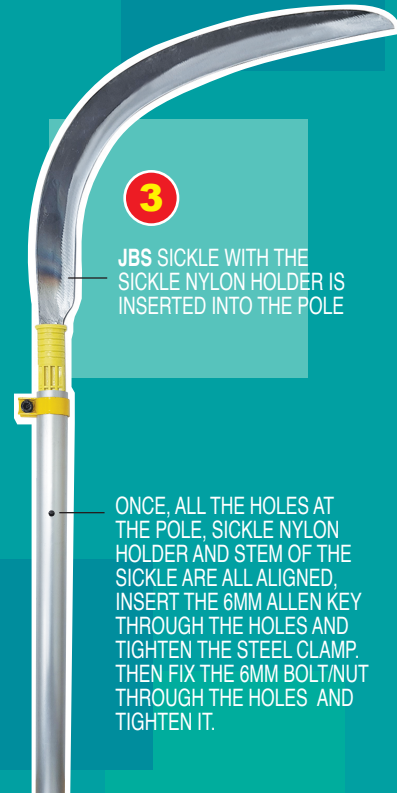

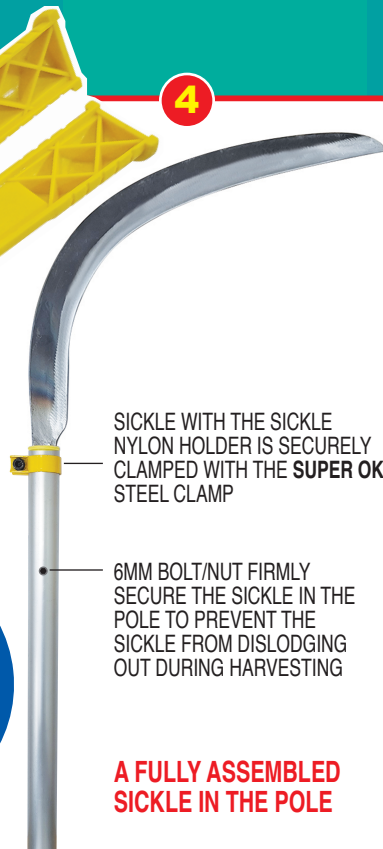

Designed for harvesters who demand **reliability, ease of use, and improved tool life**, this upgraded holder brings enhanced performance to every stroke.
